

Satin Leaf Circle, April meeting

Satin Leaf Circle met the first Wednesday on April 1, 2026

We have 28 members in total in our membership

We met at Katharina Stejskal's house and the program was given by Carly Batts, native plant expert, who just opened her own native plant nursery in Fort Pierce named B the Change. She displayed a variety of plants and explained soil types and the pH plant requirements for the soil. Carly suggested the Martin County GEO website for anyone planting new plants.
