I have met with Mary Neal on several occasions to discuss ideas for some of the signage for the Flower Show. Debra Smith and I have been doing research for each decade in regards to historical events, clothing, music, art, inventions, achievements, etc. These sheets, once coordinated and completed by us, will be displayed in an 8” x 10” frame, with each corresponding floral design category using print and design from the decades represented.

In addition, Mary and I went to the storage shed to investigate what materials were available for staging of the event including signs, table covers, tables and display boxes, among other items.

I have done preliminary research regarding permits needed from Martin County and our committee will apply for a permit for directional and promotional signage for the day of the event to be posted in areas of Martin County. These will be posted in order to direct traffic and alert residents of our event. Once I have obtained the cost of the permit I will report that cost to the board.

There are other items that will need to be tended to as we move forward, and I will keep the Garden Club of Stuart board updated as need be.
