

GUIDED TOUR OF RIPPLE STORMWATER ECO-ART PROJECT
Friday, November 17, 2023
Old Palm City

Join us for an interesting and educational project that combines art, science and the community to help preserve the health of the St. Lucie River Lagoon. Our tour guide, Carly Batts, Staff Horticulturist for the Martin County Board of Commissioners and President of the Martin County Native Plant Society, will narrate as we leisurely stroll through native plantings along recently crated nature trails within a unique stormwater treatment area accented with artistic elements. The Ripple conservation and community beautification project is part of only a handful of such initiatives across the country to receive grant funding from the **National Endowment for the Arts**.

Meet at 9:50am in front of the Palm City Community Cener at 2701 SW Cornell Avenue by turning left (south) immediately after crossing the old Palm City Bridge into Palm City and left again into the parking lot. Wear comfortable shoes and bring water.

Tour begins at 10:00am. Maximum 20 participants
REGISTRATION DEADLINE: Monday, November 13, 2023
CONTACT: Mary Jane DuCoin
